

2025 Seed Guide

We are proud to offer our customers corn and soybean seed grown in Minnesota, most of which is grown right on our family farm in southern Minnesota. Our family strives to produce the highest quality seed by selecting lines that meet the needs of our customers and by eliminating the middleman. We hope to take some stress out of the decision making process by allowing you to deal directly with the source. All of our customers are important to us whether they purchase 1 or 100 bags of seed, whether they order ahead of time or show up on the dock in the spring. We do our best to price our seed accordingly to allow for the best price at all times.

The last couple years have brought us all challenges and many changes. One of these challenges/changes we have seen is price increases across the board on everything; things we need to survive and things we need to produce a crop. We've seen nice high commodity prices but along with those increased commodity prices comes an increase in inputs, including seed. Again this year, we've spent a lot of time crunching numbers to still give our customers the best price we could while still covering the costs we have in order to produce and sell you the seed we do. As we look ahead to the 2025 growing season, we plan to continue to provide quality seed selected for our area. We are working diligently to research and select new hybrids to replace numbers that have excelled in our lineup. We are excited to be able to offer a new corn trait for 2025 and look forward to getting it out in your fields!

If you would like to place an order please feel free to give us a call, we would love to visit with you! Thank you for choosing to purchase seed from us and best wishes towards successful farming, now and in the future!

Thank You!

ORDERING & SEED PICKUP

We can work with you to prepare and lock in your order as soon as you are ready. Orders will be accepted in person or over the phone. We can work with you to do that before the end of the year or any time up to the day of planting. We do our best to keep our prices fair for everyone and not bring the calendar or quantity into the decision making process. That being said, we do place orders on a first come first serve basis, so please keep that in mind.

We have the capabilities to do bulk seed. Bulk Seed Corn needs to be ordered as soon as possible because we prefer to do that as we process the seed corn so that we can save bags. Call 507-246-5032 if this is something you would be considering. Bulk soybeans can be ordered at anytime with 24 hours prior notice to pickup.

We prefer preorders on bulk soybeans but can work with you in season as well. Bulk comes as 40 units unless otherwise discussed. Bulk Seed sent off the farm in a Probox will be invoiced \$750 per box if not returned by June 15th. We ask that they are returned as soon as they are empty, no later than June 15th.

Treated soybeans must be ordered by MARCH 1st. Treated soybeans must be paid for prior to treating. Treated soybeans are NON-RETURNABLE, please figure accordingly. Call for treating options.

When it is time to pickup seed in the spring we will send out a post card to those that have ordered to let them know when we are ready to start moving seed, usually early April depending on Mother Nature. We do not deliver seed, you are expected to lineup your own shipping or pick it up yourself. Seed must be paid for upon pickup, prepay is welcome.

RETURN POLICY

We will accept returns of seed corn and soybeans up until **JUNE 15th**. Seed returns accepted after **JUNE 15th** will be charged a restocking fee of \$20/unit. ***No Seed returns will be accepted after July 1st.*** We will NOT accept returns of opened, wet, dirty, unsaleable or damaged bags of seed. We will NOT accept returns of treated soybeans. Proboxes must be returned by **June 15th**, or customer will be charged \$750 per box.

Clean fields. Bigger yields. Easy decision.

Advanced trait technology for exceptional weed and above-ground pest control.

Product overview

- Exceptional broad-spectrum protection against above-ground pests
- Stacked with the Enlist® corn trait for multiple sites of action against tough weeds

Farmer benefits

- Insect control against black cutworm, fall armyworm, European and southwestern corn borers, and corn earworm
- Herbicide flexibility with the Enlist® weed control system, which offers tolerance to 2,4-D choline in Enlist® herbicides
- Enlist weed control system provides a whole-farm solution across corn, soybean and cotton acres

Refuge requirements

- **Corn Region:** 5% separate, structured refuge
- **Cotton Region:** 20% separate, structured refuge

- **Corn Region:** 5% integrated refuge included in the bag
- **Cotton Region:** 20% additional separate, structured refuge

™ & Trademarks of Corteva Agriscience and its affiliated companies. Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. PowerCore® is a registered trademark of Monsanto Technology LLC. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. Assure® II herbicide is currently the only FOP herbicide for in-crop use with Enlist® corn. Assure II herbicide (quizalofop) is a Group 1 herbicide for grass control. Product responses can vary by location, pest population, environmental conditions, and agricultural practices. Please contact your Corteva Agriscience sales professional for information and suggestions specific to your operation. Individual results may vary. Various factors, including pest pressure, reduced susceptibility, and insect resistance in some pest populations may affect efficacy of certain corn technology products in some regions. To help extend durability of these technologies, Corteva Agriscience recommends you implement Integrated Pest Management (IPM) practices such as crop rotation, cultural and biological control tactics (including rotating sources of Bt-protected corn traits), pest scouting, and appropriate use of pest thresholds when employing management practices such as insecticide application. You must also plant the required refuge when using these technologies. Please contact your sales professional or consult with your local university extension for more information regarding insect resistance management guidelines, best management practices and to understand whether there has been a shift in susceptibility or insect resistance with certain pests documented in your area. Genuity VT Double PRO® is a registered trademark of Bayer Group. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of BASF. Always read and follow label directions.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on PowerCore® Enlist® corn crops.

THE NEXT GENERATION OF TECHNOLOGY

2,4-D choline

Glyphosate

Glufosinate

FOP Herbicides

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

A154E3

Maturity: 1.5 RM

Trait: Enlist E3® Soybean Technology

Iron Chlorosis (IDC) VG

SDS Tolerance G

White Mold G

Stress Tolerance VG

- > Fits a high yield environment
- > Upgrade to our old A151E3
- > Peking for SCN
- > Total package kind of bean
- > Resistant to brown stem rot and stem canker

A174E3

Maturity: 1.7 RM

Trait: Enlist E3® Soybean Technology

IDC G

SDS Tolerance VG

White Mold G

Stress Tolerance G

- > Strong disease package
- > Very good emergence
- > High yield potential
- > Clean looking bean
- > Resistant to brown stem rot & stem canker

A184E3

Maturity: 1.8 RM

Trait: Enlist E3® Soybean Technology

Iron Chlorosis (IDC) VG

SDS Tolerance VG

White Mold VG

Stress Tolerance VG

- > Very good standability
- > Strong IDC tolerance
- > Shines in a high yield environment
- > Resistant to stem canker
- > Exciting total package bean

A1923XF

Maturity: 1.9 RM

Trait: XtendFlex® Soybeans

Iron Deficiency Chlorosis G

SDS Tolerance G

White Mold G

Stress Tolerance VG

- > Broad spectrum performance
- > Excellent standability
- > Resistant to brown stem rot & stem canker
- > Excellent yield potential
- > Moves well north & south of zone

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted. No dicamba formulations have been registered for such in-crop use at the time this material was published. Please follow <https://www.roundupreadyxtend.com/pages/xtendimax-updates.aspx> for status updates.

A203E3

Maturity: 2.0 RM

Trait: Enlist E3® Soybean Technology

Iron Chlorosis (IDC) VG

SDS Tolerance G

White Mold G

Stress Tolerance VG

- > Taller plant with very good standability
- > Resistant to brown stem rot and stem canker
- > Very good IDC tolerance
- > Awesome total package bean
- > Very good yield potential

Think Before You Bin Run

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Roundup Ready 2 Yield® soybean, Roundup Ready 2 Xtend® soybean, and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology

- // High-yielding soybean technologies
- // Better variety options
- // Leading seed treatment options

Customer Service

- // Dealer agronomic support before and after the sale
- // Replant policy support
- // Convenient packaging and delivery

Reliable Germination and Quality

- // Rigorously tested and meets U.S. Federal Seed Act requirements
- // Free of seed-borne diseases
- // Properly stored and conditioned

For a list of Bayer's trait patents go to cs.bayerpatents.bayer.com

For questions regarding seed intellectual property, or to anonymously report a saved seed tip, you can contact Bayer in the following ways:

1. Call 1-866-99-BAYER
2. Send a letter: Trait Stewardship, 622 Emerson Road, Suite 150, Creve Coeur, MO 63141
3. Submit a contact request at cropscience.bayerus/contact or scan the QR code

Bayer is a member of the Seed Innovation and Protection Alliance. Visit www.seedipalliance.com to learn more. SIPA™ is a trademark of the Seed Innovation and Protection Alliance. Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets, with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing locked traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glufosinate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glufosinate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology. Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contain genes that confer tolerance to glyphosate, glufosinate and dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs. Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-383-6847 for recommended Roundup Ready® Xtend Crop System weed control programs. A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM FOR SOYBEANS

2,4-D choline | Glyphosate | Glufosinate

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist E3® soybean crops.

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango® DMA® herbicide, Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Are you licensed? If you purchase anything traited from us, you are required to sign a license with the appropriate company to be compliant with your traited seed purchase. AgCelerate makes this an easy process, as you can sign all necessary licenses in one process. To be compliant for the traited products we sell, we recommend a Bayer Technology Stewardship Agreement (TSA) and a Corteva Technology Use Agreement. Please feel free to call our office if you need any help or a paper copy.

New for 2025: We highly encourage you to create an account with AgCelerate and update your agreements with Bayer and Corteva. AgCelerate is the most efficient way to manage your licenses and makes it a very quick process for the grower and us, the supplier. They have a tab called "Support & FAQs" and this tab will give you access to a user guide if you would like step by step instructions to get signed up. If you are unable to create a login please give us a call and we will walk you through this process. If you already have an account, please jump on and re-sign your licenses.

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, and Enlist® Corn - REFUGE traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, and Enlist Corn - REFUGE seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. **Growers who fail to comply with IRM requirements risk losing access to this product.** To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide. Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html. Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, Corteva Agriscience's product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® corn and soybeans. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. POWERCORE® is a registered trademark of Bayer Group. POWERCORE® multi-event technology developed by Corteva Agriscience and Bayer Group. Liberty®, LibertyLink® and the Water Droplet Design are registered trademarks of BASF. ®Roundup and Roundup Ready are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. ™ ® Trademarks of Corteva Agriscience and its affiliated companies.

CORN TRAITS GUIDANCE TOOL

DO YOU KNOW WHAT TRAIT IS RECOMMENDED FOR YOUR FIELDS?

- SmartStax® PRO with RNAi Technology is recommended for moderate to high corn rootworm (CRW) pressure environments including corn on corn operations.
- VT4PRO™ with RNAi Technology and SmartStax® Technology are recommended for low to moderate corn rootworm pressure environments and areas at risk for extended diapause northern corn rootworm and areas with the western corn rootworm variant that lay eggs in soybean fields.
- For more in-depth guidance on trait recommendations for your operation, please see below.

| How many years have you planted corn on corn? | Did you witness any corn rootworm damage in your corn crop last year? | What is your concern about corn rootworm in your fields? | Trecepta® TECHNOLOGY VTDoublePRO® TECHNOLOGY | VT4PRO® RNAi TECHNOLOGY SmartStax® TECHNOLOGY | SmartStax® PRO WITH RNAi TECHNOLOGY | Crop Rotation |
|---|---|--|---|--|--|------------------------|
| 0* | No | Low or Moderate | Primary Recommendation | Secondary Recommendation | | |
| 0* | No | High | | Primary Recommendation | | |
| 1-4 | Yes | Low, Moderate or High | | Secondary Recommendation | Primary Recommendation | |
| 1-4 | No | High | | Primary Recommendation | | |
| 1-4 | No | Low or Moderate | Primary Recommendation | Secondary Recommendation | | |
| 5+ | Yes | Low, Moderate or High | | | Primary Recommendation | |
| 5+ | No | Low or Moderate | | Secondary Recommendation | Primary Recommendation | |
| 5+ | No | High | | | Secondary Recommendation | Primary Recommendation |

Recommendations above may not fit every scenario and may be impacted by environmental factors and other management practices. Reach out to your local agronomic expert for further recommendations.

= Primary Recommendation
 = Secondary Recommendation

* Includes areas with CRW extended diapause or western CRW soybean variant.

- Price, germplasm, agronomic fit, and availability will help guide the VT4PRO™ Technology vs. SmartStax® Technology decision.
- Expected level of pressure from western bean cutworm, corn earworm, and corn rootworm will help guide the VT Double PRO® Technology vs Trecepta® Technology vs VT4PRO™ Technology decision.

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted. No dicamba formulations have been registered for such in-crop use at the time this material was published. Please follow <https://www.roundupreadyxtend.com/pages/xtendimax-updates.aspx> for status updates.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology. B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state. Refuge seed may not always contain the DroughtGard® trait. IMPORTANT ILM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the ILM/Grower Guide for additional information. Always read and follow ILM requirements. Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contain genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to dicamba may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO®, VT4PRO™ and XtendFlex® are trademarks of Bayer Group. Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: tug.bayer.com. U.S. patents for Bayer technologies can be found at the following webpage: cs.bayerpatents.bayer.com

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Oat and wheat variety information will be available in December. Watch for an update.

4- Way Grass Mix

30% Smooth Brome, 30% Low Endophyte Tall Fescue, 30% Perennial Ryegrass, 10% Climax Timothy

- > All purpose, all grass mix
- > Adaptable to many soil types
- > Varieties not stated
- > Recommended solid seeding rate: 25#/ acre
- > Ask for companion recommendations

Northern Best Brand II Alfalfa

- > A mix of high quality and high yielding varieties
- > Superior performance for hay or silage
- > Dependable winter hardy alfalfa
- > Resistant to bacterial wilt, common leaf spot, fusarium, & phytophthora root rot
- > A blend of high quality, high yielding varieties, all varieties are VNS
- > Recommended solid seeding rate: 12-18#/ acre
- > Ask for companion recommendations

Vernal Alfalfa

- > Uniquely winter hardy
- > Very high yield potential
- > Fast recovery and can tolerate frequent cutting
- > Fine stemmed with dark green leaves
- > Limited disease resistance
- > Released by Wisconsin in 1953
- > Recommended solid seeding rate: 12-18#/ acre
- > Ask for companion recommendations

Grass & Other Seed Needs

We have gone away from keeping Orchard and Brome on hand, 4 way mix is grass we will have on hand. Please call ahead and order grasses if you know you will need them. If there is something you need but you do not see listed in our catalog give us a call @ 507-246-5032 and we will do our best to get it in for you

Meet the Team
