

ANDERSON SEEDS

2027 Seed Guide

Dearest Customer,
We are proud to offer our customers corn and soybean seed grown for Minnesota, and as much as possible is grown in Minnesota. Our family strives to produce the highest quality seed by selecting lines that meet the needs of our customers and by eliminating the middleman. We hope to take some stress out of the decision making process by allowing you to deal directly with the source. All of our customers are important to us whether they purchase 1 or 100 bags of seed, whether they order ahead of time or show up on the dock in the spring. We do our best to price our seed accordingly to allow for the best price at all times.

As if the past few years have not been challenging enough, here we are again facing more challenges that affect our bottom line. We know a lot of thought goes into every decision and we strive to provide products that drive a strong field average while covering as many important agronomic needs as possible. Again this year, we've spent a lot of time crunching numbers to still give our customers the best price we could while still covering the costs we have in order to produce and sell you the seed we do. As we look ahead to the next growing season, we plan to continue to provide quality seed selected for our area. We are working diligently to research and select new hybrids to replace numbers that have excelled in our lineup. This also includes looking into traits that we feel best meet the needs of our customers.

If you would like to place an order please feel free to give us a call, we would love to visit with you! Thank you for choosing to purchase seed from us and best wishes towards successful farming, now and in the future!

Thank You!
Peter, Neal, Kelsey, Jacob & Families

Ordering & Seed Pick-up

Ordering: Orders can be placed in person or by phone anytime before planting. Orders are filled on a first-come, first-served basis, with fair pricing regardless of order date or quantity.

Bulk Seed Corn: Order as soon as possible to help reduce bag usage during processing. Call us at 507-246-5032 for more details.

Bulk Soybeans: Preorders are preferred, but in-season orders are accepted with 24 hours' notice before pickup. Standard bulk orders are 40 units unless otherwise arranged.

Proboxes: Boxes not returned by June 15 will incur a $750 charge. Please return empty boxes as soon as possible.

Treated Soybeans: Must be ordered by March 15th and paid for before treatment. Treated soybeans are non-returnable. Options include a fungicide/insecticide product for $9 and an inoculant for $2. Plus other options, call to inquire. Pricing is subject to change without notice.

Spring Pickup: Customers will receive a postcard when seed is ready for pickup, typically in early April, depending on weather.

Delivery and Payment: Delivery is not available. Customers must arrange their own shipping or pick up seed themselves. Payment is due at pickup, and prepayment is welcome.

RETURN POLICY

We will accept returns of seed corn and soybeans up until JUNE 15th. Seed returns accepted after JUNE 15th will be charged a restocking fee of $20/unit. No Seed returns will be accepted after July 1st.

We will not accept returns of opened, wet, dirty, unsaleable or damaged bags of seed. We will not accept returns of treated soybeans.

Proboxes must be returned by June 15th, or customer will be charged $750 per box.

CORNTRAITSGUIDANCE TOOL

DOYOUKNOWWHATTRAIT IS RECOMMENDED FOR YOUR FIELDS?

- SmartStax PRO with RNAiTechnologyisrecommendedformoderatetohighcornrootworm(CRW) pressureenvironments includingcorn on corn operations.
- VT4PRO™with RNAi TechnologyandSmartStaxTechnologyarerecommendedforlowtomoderate corn rootworm pressure environments and areas at risk for extended diapause northerncornrootwormandareaswiththewesterncornrootworm variant that lay eggs in soybean fields.
- For more in-depth guidance on trait recommendationsforyouroperation,pleaseseebelow.

How many years have you planted corn on corn?	Did you witness any corn rootworm damage in your corn crop last year?	What is your concern about corn rootworm in your fields?	Trecepta® TECHNOLOGY / VTDoublePRO® TECHNOLOGY	VT4PRO™ RNAi TECHNOLOGY / SmartStax® TECHNOLOGY	SmartStaxPRO™ RNAi TECHNOLOGY	Crop Rotation
0*	No	Low or Moderate	■	□		
0*	No	High		■		
1-4	Yes	Low, Moderate or High		□	■	
1-4	No	High		□	■	
1-4	No	Low or Moderate		■	□	
5+	Yes	Low, Moderate or High			□	■
5+	No	Low or Moderate		□	■	
5+	No	High			□	■

Recommendations above may not fit every scenario and may be impacted by environmental factors and other management practices. Reach out to your local agronomic expert for further recommendations.

■ = Primary Recommendation

□ = Secondary Recommendation

* Includes areas with CRW extended diapause or western CRW soybean variant.

- Price, germplasm, agronomic fit, and availability will help guide the VT4PRO™ Technology vs. SmartStax® Technology decision.
- Expected level of pressure from western bean cutworm, corn earworm, and corn rootworm will help guide the VT Double PRO® Technology vs Trecepta® Technology vs VT4PRO™ Technology decision.

Additional Advice:

Always consider your overall return on investment when making your final trait decision.

- One trait may offer more protection than you may need at the time, but (based on the product) will still have potential to deliver a better return on investment than another trait.
- Inversely, a trait may provide less protection than recommended, but (depending on the product) may outperform a product with the recommended trait in your area.

When your risks are known and accounted for, Bayer always recommends the trait that offers the best return on investment for your operation.

What is Tar Spot and How Does it Impact Corn?

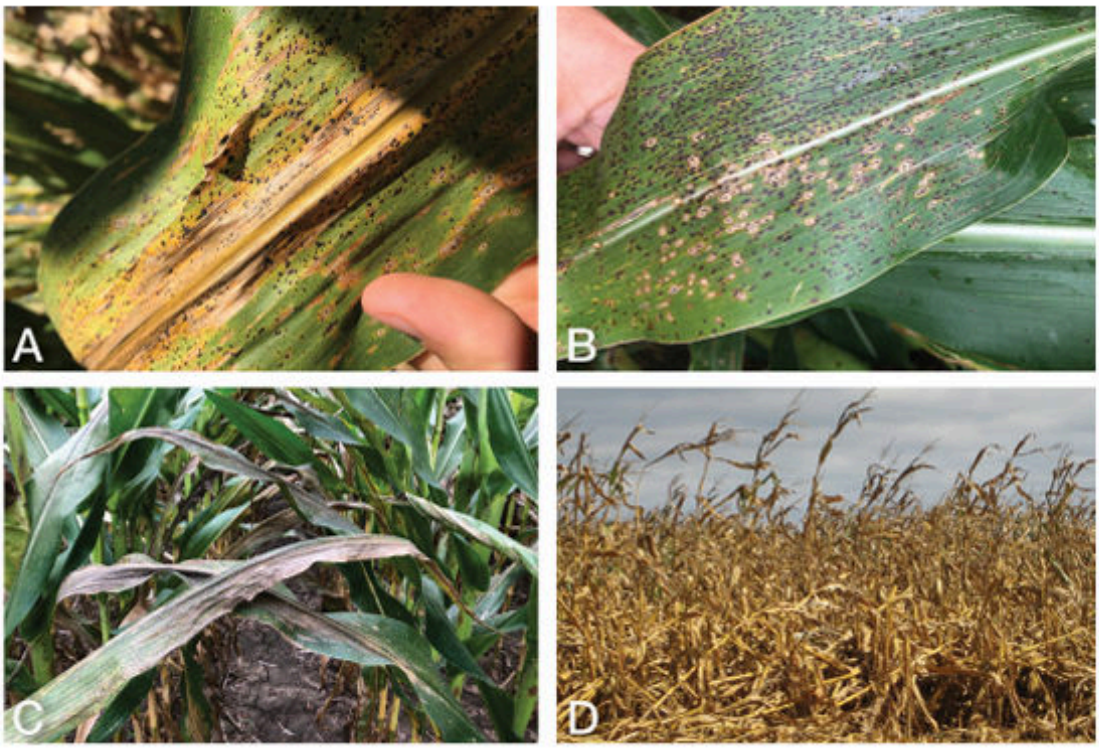

Figure 2. Tar spot is a fungal disease that appears as a series of black spots containing spores on corn leaves (A and B). Depending on the date of infection, the spores may proliferate on the plant's leaves and cause reduced photosynthesis (C), which can lead to stalk cannibalization and poor standability (D).

ENLIST® WEED CONTROL SYSTEM

OVERVIEW

ON-TARGET APPLICATIONS:
90% less drift than traditional 2,4-D
96% less volatile than 2,4-D ester

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

Enlist E3® SOYBEANS
| 2,4-D choline
| Glyphosate
| Glufosinate

POWERCORE® Enlist®
| 2,4-D choline
| Glufosinate
| Glyphosate
| FOP Herbicides

HERBICIDE

Enlist Duo®
COLEX-D® technology
- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

Enlist One®
COLEX-D® technology
- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Roundup Ready 2 Yield® soybean, Roundup Ready 2 Xtend® soybean, and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology
// High-yielding soybean technologies
// Better variety options
// Leading seed treatment options

Customer Service
// Dealer agronomic support before and after the sale
// Replant policy support
// Convenient packaging and delivery

Reliable Germination and Quality
// Rigorously tested and meets U.S. Federal Seed Act requirements
// Free of seed-borne diseases
// Properly stored and conditioned

4- WAY GRASS MIX

> All purpose, all grass mix
> Adaptable to many soil types
> Varities not stated
> Recommended solid seeding rate: 25#/ acre
> Ask for companion recommendations

30 % Smooth Brome
30 % Low Endophyte Tall Fescue
30 % Perennial Ryegrass
10 % Climax Timothy

Northern Best Brand II Alfalfa

> A mix of high quality and high yielding varieties
> Superior performance for hay or silage
> Dependable winter hardy alfalfa
> Resistant to bacterial wilt, common leaf spot, fusarium, & phytopthora root rot
> A blend of high quality, high yielding varieties, all varieties are VNS

Recommended solid seeding rate: 12-18#/ acre
Ask for companion recommendations

Viking 330M

> High quality, multi-leaf alfalfa variety
> Good all-around variety for disease resistance
> Excellent yields, recovers quickly
> Economical choice for good quality hay
> Best fit for a 3-4 cut system

Recommended solid seeding rate: 12-18#/ acre
Ask for companion recommendations

Grass & Other Seed Needs

We have gone away from keeping Orchard and Brome on hand, 4 way mix is grass we will have on hand.Please call ahead and order grasses if you know you will need them.

If there is something you need but you do not see listed in our catalog give us a call @ 507-246-5032 and we will do our best to get it in for you.

OTHER SEED NEEDS

MN-Torgy Hard Red Spring Wheat

> Top yielding variety, Medium maturity
> Medium short straw, good straw strength
> Good test weight
> Good disease resistance
> Released by U of M

Recommended solid seeding rate: 115-135#/ acre
or 1.3 - 1.4 mill. plants/acre

SD Ranger Oats

> Med-Late maturity, medium height
> Good milling potential
> Heavy test weight
> Avoid heavily fertilized fields to manage lodging
> Released by SDSU 2024

Recommended solid seeding rate: 100-125#/ acre
or 1.25 - 1.3 mill. plants/acre

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.traitstewardship.com

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www. traitstewardship.com to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE AND COUNTY OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.

POWERCORE® is a registered trademark of Bayer Group. POWERCORE® multi-event technology developed by Corteva Agriscience and Monsanto. LibertyLink® and the Water Droplet Design are registered trademarks of BASF. ®Roundup and Roundup Ready are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state.

™ ® Trademarks of Vylor and its affiliated companies.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer's biotechnology-derived products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Where applicable, commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from commercialized products can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for commercialized products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of herbicide products for in-crop use.

B.t. products may not yet be registered in all states. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of herbicide products for in-crop use.

Refuge seed may not always contain the DroughtGard® trait. IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to dicamba may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO® and XtendFlex® are registered trademarks of Bayer Group. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. LibertyLink logo® and LibertyLink® are trademarks of BASF. Respect the Refuge and Corn Design® is a registered trademark of National Corn Growers Association

Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: tug.bayer.com. U.S. patents for Bayer technologies can be found at the following webpage: cs.bayerpatents.bayer.com

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management,** for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

ORDERS ACCEPTED ANYTIME- Please call 507-246-5032 to place an order.
All Prices are subject to change without notice. Prepay is welcome, invoice due at time of pickup.
All prices are set to be fair to all customers. Results may vary

Are you licensed? If you purchase anything traited from us, you are required to sign a license with the appropriate company to be compliant with your traited seed purchase. AgCelerate makes this an easy process, as you can sign all necessary licenses in one process. To be compliant for the traited products we sell, we recommend a Bayer Technology Stewardship Agreement (TSA) and a Corteva Technology Use Agreement. Please feel free to call our office if you need any help or a paper copy.

**REQUIRED: Bayer has requested that ALL GROWERS resign their license agreements to stay current. Most of our customers did this in 2026 but if we missed you please let us know and we will help you get this done.

Contact us @ 507-246-5032 to place you order today!
We like to be fair to all of our customers and we care not to hassle you with games.
